a/ - Type of service offered: 1, Physicians'; 2, Surgeons'; 3, Hospital; 4, Drug; 5, Dental.

b/ - For units shown under the various state headings to have reported physicians' and surgeons' charges. These units total 481 and include 582 counties in 31 states with a membership of 66,755 families, 348,392 persons, or 75.8 percent of the total reported membership in units offering physicians' and surgeons' services on a fee-for-service basis. In Region III several units pay not more than 50 percent on physicians' and surgeons' charges at the end of each quarter, delaying further payments until the end of the year. Such units have not been taken into account in estimating percent paid on physicians' and surgeons' charges.

c/ - This figure represents the amount paid rather than approved charges for units paying for services on the basis of the number of families for which each physician, hospital or dentist has accepted responsibility for professional care. U.S. and regional totals also represent only the experience of capitation units shown under the various state headings to have reported for this month.

d/ - Included in membership of another unit and therefore not counted in membership totals.

e/ - For units shown under various state headings to have reported expenditures for hospital service in April on a fee-for-service basis. The figures shown in the column headed Percent of Physicians and Hospital Charges are taken from reports of units which include hospital care among the services offered and represent the percentage of total charges for physicians', surgeons' and hospital services. The total charge for physicians' and surgeons' services was \$72,472.83. This with the \$11,473.93, hospital charges, makes a total of \$83,946.76, of which the hospital charges are 13.7 percent.

f/ - For dental care units shown under the various state headings to have submitted reports for April on a fee-for-service basis. There were 94 such units in 95 counties with a membership of 12,372 families, 66,645 persons, which is 73.3 percent of the total reported membership. These totals do not include the dental care in units offering this service along with physicians' service.

g/ - Membership totals for these units taken from reports for months other than April.

**Report on activities of the
Farm Security Administration medical care program through
county, district and state units based on reports of units
for the months of May and June, 1941**

FEB 9 - 1942

The addition of California to the list of states participating in the medical care program is to be noted in the June report. This brings the total of participating states to 33, or 38, including Michigan, Wisconsin, and Oregon, in which at the time of these reports only dental care units were operating. A net increase of 23 medical care units in 39 counties and of 14 dental care units in 16 counties is shown in the two months covered by these reports.

The percentage payment on physicians' charges shown in the report for June (84.8 percent) is the highest reported since November, 1940, when a payment of 89 percent was reported. On the other hand, the percentage payment on hospital charges shown in the report for June (86.2 percent) is the lowest reported since November, 1940, when a payment of 64 percent was reported.

- a/ Type of service offered: 1 - physicians'; 2 - surgeons'; 3 - hospital; 4 - drug; 5 - dental.
- b/ The units shown under the various state headings to have reported physicians' and surgeons' charges. These units total 493 and include 616 counties in 31 States with a membership of 71,502 families 370,588 persons or 77.6 percent of the total reported membership in units offering physicians' and surgeons' services on a fee-for-service basis. In Region III several units pay not more than 50 percent on physicians' and surgeons' charges at the end of each quarter, delaying further payments until the end of the year. Such units have not been taken into account in estimating percent paid on physicians' and surgeons' charges.
- c/ This figure represents the amount paid rather than approved charges for units paying for services on the basis of the number of families for which each physician, hospital, druggist or dentist has accepted responsibility for professional care. U.S. and Regional totals also represent only the experience of Capitation units shown under the various state headings to have reported for this month.
- d/ Included in membership of another unit and therefore not counted in membership totals.
- e/ For units shown under the various state headings to have reported expenditures for hospital service on a fee-for-service basis. The figures shown in the column headed per cent of physicians and hospital charges are taken from reports of units which include hospital care among the services offered and represents the percentage of total charges for physicians', surgeons' and hospital services. The total charge for physicians' and surgeons' was \$84,985.15, this with the \$14,674.37 hospital charges make a total of \$99,659.52 of which the hospital charges are 14.7 percent.
- f/ For dental care units shown under various state headings to have submitted reports for May on a fee-for-service basis there were 95 such units including 98 counties, with a membership of 12,277 families, 66,153 persons, which is 88.4 percent of the total reported membership.
These totals do not include the dental care in units offering this service along with physicians' service.
- g/ Membership totals for these units taken from reports for months other than May.

a/ - Type of service offered: 1 - physicians'; 2 - surgeons'; 3 - hospital; 4 - drug; 5 - dental.

b/ - The units shown under the various state headings to have reported physicians' and surgeons' charges. These units total 487 and include 609 counties in 32 states with a membership of 69,085 families, 357,578 persons or 73.1 percent of the total reported membership in units offering physicians' and surgeons' services on a fee-for-service basis. In Regions III and IX several units pay not more than 50 percent on physicians' and surgeons' charges at the end of each quarter, delaying further payments until the end of the year. Such units have not been taken into account in estimating percent paid on physicians' and surgeons' charges.

c/ - This figure represents the amount paid rather than approved charges for units paying for services on the basis of the number of families for which each physician, hospital, druggist or dentist has accepted responsibility for professional care. U.S. and Regional totals also represent only the experience of capitation units shown under the various state headings to have reported this month.

d/ - Included in membership of another unit and, therefore, not counted in membership totals.

e/ - For units shown under the various state headings to have reported expenditures for hospital service on a fee-for-service basis. The figures shown in the column headed Percent of Physicians', Surgeons', and Hospital Charges are taken from reports of units which include hospital care among the services offered and represent the percentage of total charges for physicians', surgeons', and hospital services. The total charges for physicians' and surgeons' services were \$71,730.64; this with the \$15,718.78, charges for hospital services, makes a total of \$87,449.42 of which the hospital charges are 17.9 percent.

f/ - For dental care units shown under the various state headings to have submitted reports for June on a fee-for-service basis. There were 99 such units including 101 counties in 8 states with a membership of 15,252 families, 81,268 persons, which is 77 percent of the total reported membership. In Region IX some units pay only 50 percent on dentists' bills at the end of each month, delaying further payments until the end of the year. Such units have not been taken into account in estimating percent paid on dentists' charges. Totals do not include the dental care units offering this service along with physicians' service.

g/ - Membership totals for these units taken from reports for months other than June.

- (a) This is a second medical care unit in this county. The county has, therefore, already been counted in the total of counties.
- (b) The second county in a two-county unit which has been listed as a one-county unit.
- (c) Counties which were counted twice since they were listed as parts of the territory of two different medical or dental care units.
